Its expertise covers a broad spectrum of fields ranging from the traditional areas of "pure" mathematics, such as analysis, algebra, geometry, and topology, to applied mathematics areas such as combinatorics, computational biology, fluid dynamics, theoretical computer science, and theoretical ... Implicit function - Wikipedia Examples Inverse functions. A common type of implicit function is an inverse function. Not all functions have a unique inverse function. If g is a function of x that has a unique inverse, then the inverse function of g , called g^{-1} , is the unique function giving a solution of the equation $y = g(x)$ for x in terms of y . This solution can then be written as $x = g^{-1}(y)$. Geodesic - Wikipedia In differential geometry, a geodesic (γ) is a curve representing in some sense the shortest path between two points in a surface, or more generally in a Riemannian manifold. It is a generalization of the notion of a "straight line" to a more general setting. The term "geodesic" comes from geodesy, the science of measuring the ...
