*Condensed Matter Nuclear Science Hagelstein Peter L Chubb Scott R* Cold fusion is a hypothesized type of nuclear reaction that would occur at, or near, room temperature. It would contrast starkly with the "hot" fusion that is known to take place naturally within stars and artificially in hydrogen bombs and prototype fusion reactors under immense pressure and at temperatures of millions of degrees, and distinguished from muon-catalyzed fusion. - Fri, 19 Apr 2019 16:14:00 GMT Martin Fleischmann - Wikipedia Fusione nucleare fredda - Wikipedia Fusione nucleare fredda (anche fusione fredda o a freddo) è il nome generico attribuito a presunte reazioni di natura nucleare che si produrrebbero a pressioni e a temperature molto minori di quelle necessarie per ottenere la fusione nucleare conosciuta, diminuendo così notevolmente le difficoltà tecnico-economiche tipiche nel raggiungere tali reazioni.
