IP address - Wikipedia An Internet Protocol address (IP address) is a numerical label assigned to each device connected to a computer network that uses the Internet Protocol for communication. An IP address serves two principal functions: host or network interface identification and location addressing.. Internet Protocol version 4 (IPv4) defines an IP address as a 32-bit number. ifconfig - Wikipedia ifconfig is a system administration utility in Unix-like operating systems for network interface configuration.. The utility is a command-line interface tool and is also used in the system startup scripts of many operating systems. It has features for configuring, controlling, and querying TCP/IP network interface parameters. Ifconfig originally appeared in 4.2BSD as part of the BSD TCP/IP suite. Configure Commonly Used IP ACLs - Cisco This document provides sample configurations for commonly used IP Access Control Lists (ACLs), which filter IP packets based on: Source address Techland: How To: Configure EasyN IP Web Camera Hi Mike, Yes the camera page sometimes doesn't load, but when I refresh it, it comes up fine. I have put it down to cheap hardware. The components e.g. for the LAN/Wireless card are probably very poor quality so we can't expect the world!
